Current trends in coronary interventions: An overview from the first time issued guidelines for percutaneous coronary interventions (PCI) in spring 2005. The strengths of ESC guidelines for percutaneous coronary interventions (PCI) published today give the highest degree of recommendation for the radial approach over the femoral one for PCI. The ESC guidelines for coronary interventions recommend radial approach for PCI. The European Society of Cardiology (ESC) guidelines for PCI in stable coronary artery disease (CAD) versus coronary artery bypass grafting (CABG) and PCI are based on the latest guidelines of the society for cardiovascular angiology and interventions. The ESC guidelines recommend radial approach for PCI. The European Society of Cardiology (ESC) guidelines for PCI versus multivessel percutaneous coronary intervention (PCI) versus multivessel PCI for ST-elevation myocardial infarction (STEMI) are based on the latest guidelines of the society for cardiovascular angiology and interventions. The ESC guidelines for PCI versus multivessel PCI for STEMI update the ESC guidelines for PCI versus multivessel PCI for STEMI.
