The construction industry is ripe for disruption. Large projects across asset classes typically take 20 percent longer to finish than scheduled and are up. Businesses are ramping up their efforts to optimize the business outcome with cloud computing, big data analytics, mobility, and the Internet of Things. Industry 4.0 and predictive technologies for asset management are critical. Poor maintenance strategies can substantially reduce a plant's productive capacity as machine parts are taken offline for servicing. Many organizations are investing in new technology, such as predictive maintenance, to improve efficiency and reduce downtime.

Sachin Bansal plans 1 million unit factory. Ather Energy was one of the earliest start-up investments of Sachin Bansal. The company became the largest display maker once a dying company. BOE Technology Group is now capable of churning out displays for more applications in the service industry. A review of the current knowledge of the future of employment and how susceptible are jobs to computerisation doing so we build on the existing literature in two ways, understanding the implications of digitisation and automation in the context of industry 4.0.
